Dear Sir

With reference to your query about Solar Reflectance Index (SRI) of INSULTEC, please note that we have tested INSULTEC for Solar emissivity and Solar reflectance with various renowned laboratories around the world like, Setsco of Singapore, Geo Tech of USA, and Vipac of Australia.

On the basis of above tests the Solar Reflectance Index (SRI) of INSULTEC can be calculated as follows:

Solar Reflectance of INSULTEC = 98.3

We can achieve even higher values by using Glaze coat over the INSULTEC.

Should you require any further information or clarification on the above matter, please feel free to contact this office

Certified true and correct on behalf of Insulating Technology Pty Ltd

Mrs. Janice Brooks
Managing Director
