

Tuff & Shine

For Scratch and UV Resistance PU clear coat

About Tuff & Shine Coat

Tuff & Shine Coat is transparent water based PU coat for exterior & interior applications. It is a single coat application for a finished painted surface. It is a two part mixer consisting of resin (part-A) and hardener (part-B). This mixture has to be prepared in 5:1 proportion and has to be applied within 1 hour of it's preparation.

Application Method

- Clean the surface thoroughly & make it free from loose dust & oil.
- Wash the surface with water.
- Apply the first coat of TUFF & SHINE COAT by brush or spray.
- If necessary two successive coats.
- Make sure no dust layer is formed between.
- Apply one coat as top coat and 2 coats for longer and better performance.

Advantages of Tuff & Shine coat

- For pencil hard scratch resistance, water resistance, UV resistance, Fast dry and abrasion resistance.
- Water based clear matt top coat for flexible, yet, total Dust Resistance and 60% to 70% Gloss.
- On primed concrete, PU & Epoxy self levelling floor and as top coat to 'INSULTEC' as best protective coat.
- Single coat application on any painted surface for all weather protection.

Coverage

1 ltr. Tuff & Shine COAT covers 80-90 sq. ft. in a single coat when application is on finish painted surface.

Available Size

1 Ltr, 5 Ltr.
