EPOXY TILE GROUT

3 – Part High Strength Tiles Joint Filler

Weather Tuff®

Building Surface Solutions

ISO 9001 : 2015

- **Area of Application :** Toilets, Swimming Pools, Malls, Hotels, Restaurants, Theaters, Hospitals
- **Surface Preparation :** Joints should be free from oil, dust free or any contamination. Space should be proper dry & clean.
- **Mixing of all Packing :** Mix part - 1 & Part -2 in a clean dry vessel and stir well properly. Now add powder part to this mixture in proper way according to your need.
 - It should not be in lump form consistency should be such that you can fill the joint very smoothly and easily.

- **Application :** Press the Epoxy Tilegrout Firmly in the joints and make sure that joints are fully filled. Clear the extra grout from joints and surface within 15 – 20 to minuets. Use dampen sponge with water to clear the surface in circular motion. For sparkle glossy look, use glitter gold/silver.

- **Advantages :**

| | |
|---------------------------------|-------------------------------|
| 1. Higher in Strength | 2. Crack Free, Highly durable |
| 3. Resistant to acid, Chemicals | 4. Algae & fungus free |
| 5. Non Toxic | 6. Easy to maintain & clean |
| 7. Stain Free | 8. Long Lasting |

- **Note :** • Grout Shades are approximate guides only. • Verity actual appearance and compatibility with a test area before installation commences. • Actule shades and texture will depend on job site condition. • There may be a shade variation in different batches. It is advices to mix grout from different batches to get uniform colour. • Quantities shown are approximate and are given for estimating purpose only. • Actual job site coverage's may vary. • It is always good practice when calculating coverage to allow for 10 to 15% additional material for wastage & spillage.
